IES-FUTURE JIDOEN

LAS feature

LAS students come every day after school from 15:00 and spend time in an English environment. They are able to finish their school home work here.

In addition to conversation skills students can also learn expression skills through Show & Tell, Presentation, Debate and English play.

During summer vacation, LAS students are able to come from the morning and learn more skills in an English environment. They are able to finish summer vacation home work here too.

Reason for coming everyday

By taking many lessons after school, students are able to find their passions and improve their skills which can be useful in their futures.

While English conversation school programs are very popular, children are often exposed to English only a couple of hours per week, making it difficult to retain what they have learned.

At FUTURE Tabata, we offer LAS classes every day from Monday to Friday after school where children can learn communication and expression skills through being in an English environment.
